Explanations	

As part of our sustainability-focused growth strategy, we have participated in the CDP Climate Change Reporting for the first time and achieved **a B Management Level rating**.

The Carbon Disclosure Project (CDP) is an international platform that enables companies to measure, manage, and transparently share their environmental impacts related to climate change, water security, and forest management with investors. CDP assessments utilize data across finance, supply chain, investment, and policy sectors to increase transparency and reduce environmental risks in the business world. Companies that report through CDP enhance their access to sustainable financing while also improving their environmental performance.

At Smart Solar Technologies, we are committed to taking responsibility for a more sustainable future and reducing our environmental impact. Moving forward, we aim to further strengthen our efforts and achieve even higher ratings in the coming years. Our participation in the CDP Climate Change Program marks a significant step in reinforcing our commitment to climate action and sustainability-focused strategies.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
