Announcement Content	
Explanations	

With our company's implementation of domestic solar cell production, the acceptance processes with the Ministry of Energy and Natural Resources have been completed for the Niğde Bor Solar Power Plant, which has a power generation capacity of 100 MWe (130 MWm) and uses domestically produced solar panels manufactured with domestically produced solar cells at our Aliağa Integrated Facility.

In our announcement dated October 24, 2025, we stated that the total capacity of the Niğde Bor Solar Power Plant, which had been accepted and started generating electricity, had reached 93.01 MWe (121.08 MWm) (93.01% of the total capacity). The acceptance processes for the remaining capacity have now been completed, and the total capacity that has been accepted and started generating electricity has reached **100 MWe (130.48 MWm) (100% of the total capacity).**

We hope that our Solar Power Plant, which will provide a significant amount of cash flow to our company and is one of the leading facilities in our country in terms of efficiency, will be beneficial to our country, our nation, our company, and our sector.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
