Explanations	

As it is known, within the scope of the YEKA-4 tender held in 2022, our Company was entitled to the "G4-Bor-1 Solar Power Plant" project with an installed capacity of 140 MWm/100 MWe in Niğde province Bor district. The entire infrastructure of the project has been prepared by our Company. With the domestic cell production that started in our Aliağa production facility, the production processes of solar panels to be manufactured using domestic cells have also started.

Energy Market Regulatory Board decided on dated 12.09.2024, to grant a 30-year production license to our 100% subsidiary Smart Ges Enerji Üretim Anonim Şirketi, valid until 12.09.2054, for the "G4-Bor-1 SPP" project with an installed capacity of 140 MWm/100 MWe, which is planned to be established in Bor district of Niğde province. The official letter regarding the grant was notified to us today.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
