Announcement Content	
Explanations	

Information regarding our company's domestic solar cell investments was previously provided. The machinery and equipment installation of the solar panel cell facility in Aliağa, the first phase of which was announced as 600 MW, has been completed. Trial production processes continue successfully at the Aliağa Solar Panel and Cell Production Integrated Facility, with a capacity of 800 MW achieved upon the additional investment made, and we would like to share with the public that we have the solar panel production capability with a domestic production rate of over 75% with this domestic cell production.

Our domestic cell production facility will gradually begin its commercial activities, and it is aimed to operate the facility at full capacity in the second half of the year.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
