Our company's solar cells, including wafers, are entirely manufactured in Turkey at our Aliağa facility. They have successfully completed UVID tests under IEC 61215 MQT 10, passing the testing and inspection processes conducted at TÜV SÜD Product Service laboratories.

This certification proves that our domestically produced solar cells have successfully passed the UVID test under IEC standards, demonstrating their resistance to UV degradation. It also demonstrates and documents that the solar cells produced in Turkey meet the technical criteria required for sale in the USA, North America, and Europe.

With this development, our company, Smart Solar Energy Technologies, has once again proven that its products are fully compliant with US, North American, and European standards, and has further demonstrated its quality, enabling it to operate in sales, project development, and financing in these high-margn markets.

The certificate obtained is considered important both in terms of enabling Turkey to produce and export advanced technology products and contribute to closing the foreign trade deficit, and in terms of increasing our company's competitiveness in high-profit margn global markets.

The certificate obtained is considered important both in terms of enabling Turkey to produce and export advanced technology products and helping to close the foreign trade deficit, and in terms of increasing our company's competitiveness in global markets with high profit margns.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
