Announcement Content	
Explanations	

Commercial domestic solar cell production has started at the Aliağa Solar Panel and Cell Production Facility with a capacity of 800 MW, which was previously announced to be capable of producing cells following the successful completion of our company's investment and trial production processes. At the same time, solar panel production processes were started using domestic solar cells. Thanks to the solar panels produced using domestic solar cells, the domesticity criteria have been met, and the domestic solar cell production, domestic solar panel production, shipment and delivery processes have started.

In addition, with the start of domestic solar panel production, an annual import substitution in solar cells will be achieved, the reduction of external deficit figures in the country's economy will be supported, and it will be possible for our Company to export solar panels and solar cells of Turkish origin.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
