Explanations	

Following our company's launch of domestic solar cell production, applications have begun to the Ministry of Energy and Natural Resources for partial temporary acceptance for the construction of the Niğde Bor Solar Power Plant, which will generate 100 Mwe (130 MWm) using domestically produced solar panels at our Aliağa Integrated Facility. The acceptance process is ongoing.

As stated in our statement dated August 19, 2025, the plant had previously been approved for a total partial production capacity of 53.66 MWe (69.85 MWm). Acceptance procedures **were completed today for the 39.35 MWe (51.27 MWm) section of the plant, and electricity has begun to be generated** and supplied to the grid. Including the previously approved section, the total capacity has now reached **93.01 MWe (121.08 MWm) (93,01% of the capacity).**

Applications for the remaining capacity will be put into effect as they are officially finalized and necessary announcements will be made.

We hope that our facility will be beneficial to our country, our nation, our company and our industry.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
