

SMART GÜNEŞ TEKNOLOJİLERİ ENERGY AND RESOURCE EFFICIENCY POLICY

This policy has been formulated based on the understanding that escalating economic activities and urbanization lead to increased air, water, and soil pollution, which may pose risks to people and the environment at local, regional, and global levels, and deplete finite resources.

This policy establishes the principles for energy and resource efficiency in the operations of Smart Güneş Teknolojileri A.Ş., aligned with the Sustainable Development Goals and in compliance with relevant national and international legal regulations.

Our Company;

- 1- Is committed to ensuring full compliance with legal regulations related to energy matters,
- 2- Conducts all production and other operations within the framework of the Sustainability Management System. It is committed to continuously enhancing and advancing its energy performance,
- 3- Actively supports the United Nations Sustainable Development Goals (SDGs) related to energy and resource efficiency. SDG 7 – Affordable and Clean Energy is identified as one of the priority goals,
- 4- Applies technically, economically and financially applicable principles and techniques to prevent negative effects on human health and the environment, to minimize them where they cannot be prevented, and to increase energy/resource efficiency by evaluating environmental conditions in all investment processes,
- 5- Prioritizes the procurement of products, services, and technologies that enhance energy and/or resource efficiency in purchasing processes, and supports the adoption of sustainable packaging solutions and high-performance designs,
- 6- Implements technically and financially viable and cost-effective measures to enhance the efficiency of energy, water, other resources, and material inputs by focusing on core business operations,
- 7- Adopts clean production principles in product development and production processes to conserve raw materials, energy, and water,
- 8- Implements measures to prevent or minimize water consumption to ensure that such consumption does not result in significant adverse impacts on others. The Company employs technically feasible water-saving measures in its operations.
- 9- Enhances awareness and fosters a sense of responsibility regarding energy and resource efficiency by organizing training sessions and promotional activities for employees and all other stakeholders,
- 10- Ensures the availability and accessibility of resources and information necessary to achieve all these goals and objectives.

This policy shall become effective on the date of its approval by the Board of Directors.
