

## **ENVIRONMENTAL AND CLIMATE CHANGE POLICY**

As Smart Güneş Enerjisi Teknolojileri Araştırma Geliştirme Üretim Sanayi ve Ticaret A.Ş. (“Company”), our main goal is to support the creation of a climate-friendly, sustainable development-based ecosystem with low-carbon energy technologies and R&D-oriented products and services. Our business model consists of the principles of sustainability, environment and preventing climate change. In this respect, we adopt the following principles with the Environment and Climate Change Policy, which aims to continuously improve our work:

- While we manage all our activities in accordance with the relevant environmental legislation and national-international standards, we contribute to the low-carbon energy production of all our business stakeholders with our products and services.
- We care that the technologies we use are sensitive to the environment, and in this context, we attach great importance to innovation and R&D works.
- We consider the risks and opportunities related to the environment and climate change in our decision-making processes.
- We protect natural resources, minimize waste generation with the aim of preventing and reducing pollution at its source, ensuring that resources are reused and brought back into the economy. With all this, we reflect the circular economy to our products and services.
- We take care to develop the concept of social responsibility in order to protect the environment, increase climate change and environmental awareness, including all our stakeholders, subcontractors and suppliers, and ensure that our working environment is environmentally friendly.
- We evaluate the impacts of all planned investments on biodiversity, environment and ecosystem at the project stage, and we carry out studies to reduce these effects during construction/application, operation and post-operation.
- We care about resource efficiency in all our processes within the scope of preventing and combating climate change in the entire value chain, we calculate our production-related greenhouse gas emissions accordingly, and we develop targets and projects to reduce them.
- We adopt the United Nations Sustainable Development Goals (SDGs) focused on combating climate change, and contribute to the fight against climate change in the national and international arena with our green technology-oriented and low-carbon energy production products and services.
- We pioneer the fight against climate change in Turkey and in the world, and support projects in this field by establishing collaborations and partnerships with private sector companies, academia and non-governmental organizations, especially national and international public institutions and organizations.

This Environment and Climate Change Policy has been adopted and put into practice with the Board of Directors Decision dated 23/11/2022 and numbered 2022/46.

\*\_\* The policy is regularly reviewed and updated when deemed necessary.
