<b>Explanations</b>	

Within the scope of our company's strategic investment plans, sustainability targets, efforts to reset the carbon footprint and efforts to create financial value for its activities and to reduce the costs;

In order to meet the electrical energy needs of our Gebze Factory, our Company has applied for a call letter for a connection agreement with an AC power of 4,000 kW on the land (purchased in Kahramanmaraş) within the framework of the Regulation on Unlicensed Electricity Production in the Electricity Market. We are informed that our application was evaluated positively by the responsible distribution company "Adiyaman Kahramanmaraş Elektrik Dağıtım A.Ş. (AKEDAŞ)" and the call letter regarding the connection agreement has been notified to us.

It is planned to produce more than 9,500,000 kWh of electrical energy annually with the Solar Power Plant investment that our company will establish in this capacity. This clean energy production will reduce operating costs by meeting 100% of the current annual total electricity consumption of our Gebze Plant, and it will generate additional income by selling the remaining amount of excess consumption to the relevant distribution company.

We proclaim that our above disclosure is in conformity with the principles set down in "Material Events Communiqué" of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we're personally liable for the disclosures.
